

Fresh  Start

Athletic facilities are host to debilitating strains of antibiotic-resistant Staph infections, most notably, MRSA, as well as other harmful microbes. Some result in season-ending recoveries, amputation, and even death. Sanitize with Microbe Free Solutions line of industry leading products with a long, proven history of success.

- EPA registered and approved for use against SARS-CoV-2, the virus that causes COVID-19
- Kills 99.9% of bacteria, germs, mold, mildew, and viruses
- Approved for both hard and soft surfaces
- In use, completely safe for adults, children, and pets
- Environmentally friendly, VOC and CFC free, & Hypergreen™
- Proven track record of antimicrobial success for over 30 years

We Are The Industry Standard for Sanitization. Our Hypergreen™ technology sanitizes all areas and provides an answer to harmful microbes lingering on high touch surfaces like gym floors, locker rooms, artificial turf fields, and workout equipment. Keeping a clean facility is a good start, but by no means a solution. Even freshly disinfected surfaces are subject to recontamination almost instantly. In high-contact sports, cuts, scrapes, and abrasions are inevitable, creating gateways for infection. Our easy application can be applied to vast surfaces to safely eliminate germs, bacteria, mold, mildew, and viruses.

Easy to Apply. Simply spray on to ensure coverage over vast areas of hard to reach surfaces and high touch areas.

Environmentally Safe. Our Hypergreen™ products do not release harmful chemicals into the earth, air, or ozone, making this product safe for you and the environment.

Microbe Free Solutions products are here to help keep your athletes, clients, staff, and facilities safe from harmful microbes.
