

## Fresh Start

Every day, you, your staff, and your patients face the risk of becoming infected from potentially life threatening microbes that inhabit the touch surfaces in your clinic. Provide the best possible care and a safe environment with Microbe Free Solutions' line of industry leading products.

- EPA registered and approved for use against SARS-CoV-2, the virus that causes COVID-19
- Kills 99.9% of bacteria, germs, mold, mildew, and viruses
- Approved for both hard and soft surfaces
- In use, completely safe for adults, children, and pets
- Environmentally friendly, VOC and CFC free, & Hypergreen™
- Proven track record of antimicrobial success for over 30 years

**We Are The Industry Standard for Sanitization.** The interior environments where we live and work have a big impact on the way we feel. According to the CDC, 80% of infectious disease is transmitted through touch. Treat high touch and high trafficked spaces including waiting room furniture, reception areas, and exam rooms and instruments with odorless, invisible protection. We use our patented EPA registered nanotechnology that electro/mechanically kills and prevents surfaces from supporting further contamination virtually permanently. Microbe Free Solution's antimicrobial technology physically ruptures the cell membrane, stabbing and "electrocuting" the cell with its positive charge. The antimicrobial continues to control microbial growth as long as the surface remains intact.

**Easy to Apply.** Simply spray on to ensure coverage over vast areas of hard to reach surfaces and high tough areas.

**Environmentally Safe.** Our Hypergreen™ products do not release harmful chemicals into the earth, air, or ozone, making this product safe for you and the environment.

**Microbe Free Solutions products are here to help ensure a safe environment in your clinic for your patients and your staff. Protect your facility and provide peace of mind.**
