

Fresh Start

Parks are some of the least sanitized places in our community, yet they supply most of us with a great space outdoors to have birthday parties, festivals, and local sporting events. Help keep your shared outdoor spaces safe from harmful microbes with Microbe Free Solutions.

- EPA registered and approved for use against SARS-CoV-2, the virus that causes COVID-19
- Kills 99.9% of bacteria, germs, mold, mildew, and viruses
- Approved for both hard and soft surfaces
- In use, completely safe for adults, children, and pets
- Environmentally friendly, VOC and CFC free, & Hypergreen™
- Proven track record of antimicrobial success for over 30 years

We Are The Industry Standard for Sanitization. Our Hypergreen™ technology sanitizes all areas and provides an answer to harmful microbes lingering on high touch surfaces like playground equipment, park benches, and picnic tables. Our easy application can be applied to park surfaces of any size to safely eliminate germs, bacteria, mold, mildew, and viruses that linger. Contrary to the claim that the sun kills these harmful microbes, the UVC light that is needed to do so is mostly filtered by the ozone and never reaches the Earth's surface. Some viruses and bacteria can live on hard surfaces for up to seven days. Microbe Free Solutions can keep our outdoor spaces safe for everyone by providing state of the art sanitization methods.

Easy to Apply. Simply spray on to ensure coverage over vast areas of hard to reach surfaces and high touch areas.

Environmentally Safe. Our Hypergreen™ products do not release harmful chemicals into the earth, air, or ozone, making this product safe for you and the environment.

Microbe Free Solutions products are here to help keep your sacred outdoor spaces free from contaminants, giving you greater peace of mind.
